Year in a word

STRENGTHS

What did we do well and went well this year?

What did we do that worked well?

What resources, activities, training, tools worked well?

What did others complement us on?

Weaknesses

What did we not do well?

What kept us from doing/being our best?

What challenges or gaps did we encounter?

Were there any recurring issues or bottlenecks?

What skills or resources do we lack?

Where did we fall short of expectations or goals?

How can we improve our processes or communication?

What internal factors hindered our success?

.....?

Opportunities

What external trends or changes could benefit us?
Are there untapped resources or skills we can leverage?
What partnerships or collaborations could we pursue?
Are there areas for growth or innovation?
How can we better use our strengths to seize opportunities?
What feedback or suggestions have we received that could guide improvements?

Threats

What external or internal factors posed risks or challenges?

Are there competitive pressures or market changes to address?

What recurring issues could escalate if not addressed?

How might limited resources or staffing affect our plans?

Are there technological or regulatory challenges looming?

How do we mitigate risks while pursuing opportunities?
